JSPL secures 0.511 MTPA coal linkages for Captive Power Plants

JSPL bags Coal Linkages for a 5-year duration

Coal Linkages spread over Captive Power Plants at Raigarh and Angul

Coal Linkages of close to 2.30 MTPA bagged since 2016

New Delhi, June 19th 2017: Jindal Steel and Power Limited (JSPL), India's leading Steel and Power major, has secured coal linkages of over 0.51 Tonne Per Annum in the recently concluded coal linkage auctions under Captive Power Sub-Sector. The coal linkages, secured for a 5-year duration, will provide steady supply of fuel to Captive Power Plants run by the company for its steelmaking operations. The three Captive Power Plants (CPP) of the company are located at Raigarh & Dongamahua (Raigarh District) – both in Chhattisgarh; and for powering its 810 MW CPP in the 6 MTPA Integrated Steel complex at Angul, Odisha.

The coal linkages will ensure a steady supply of thermal coal required to feed the Captive Power Plants at calorific costs significantly beneficial than coal procured through e-auctions.

These coal linkages would further enhance the operational efficiencies of steelmaking at JSPL's recently completed 6 MTPA integrated steel plant at Angul, and at its flagship steel plant at Raigarh. Since, 2016, JSPL has secured coal linkages of close to 2.3 MTPA under various sub-sectors for 5-year timeframe.
